

Outline

1. Introduction
 - 1.1. What are we going to do?
 - 1.2. How are we going to do it?
2. Web development technologies
 - 2.1. Different kind of technologies
 - 2.2. Why we choose that specific technologies: Angular(Frontend) + Golang(Backend: APIRest) + MariaDB
3. Frontend and backend
 - 3.1. What are they and how are they related? VM (similar entorn)
 - 3.2. Steps
 - 3.2.1. Setting up the database (mariadb): crear vm ubuntu server i instal·lar mariadb + crear una taula i inserir valor per defecte
 - 3.2.2. Setting up backend: Crear ApiRest -> definir router listening port3000 + crear mètode hello world
 - 3.2.3. Setting up frontend: npm install + hello world
 - 3.2.4. End-to-End
4. What is next?
 - 4.1. CSS
 - 4.2. CI/CD
5. Conclusions
